

LTO NETWORK

EQTY Passport Roadmap
2025

About LTO Network

LTO Network is a privacy-aware blockchain for Real World Assets, Data Security & Identity Solutions.

We are **GDPR** and **MiCA** compliant:

Our high standards have been trusted by

DutchCham

EQTY Passport

We are launching the EQTY Passport, a secure and reusable digital identity built directly into our Universal Wallet.

It allows users to verify their identity once and then use that verification across countless websites and platforms without ever sharing their sensitive personal data again, giving them true ownership of their identity.

This solves one of the biggest challenges in the digital world: proving who you are, simply and privately.

Development Roadmap

Our development roadmap for the EQTY Passport

KYC Tech

Blue Biometrics

1

The KYC Technology provided via our partners at Blue Biometrics will offer multiple levels of document and biometric verification.

Build

Update to Universal Wallet
iOS & Android Application

2

The Universal Wallet app will get a major upgrade to integrate this new technology.

WalletConnect

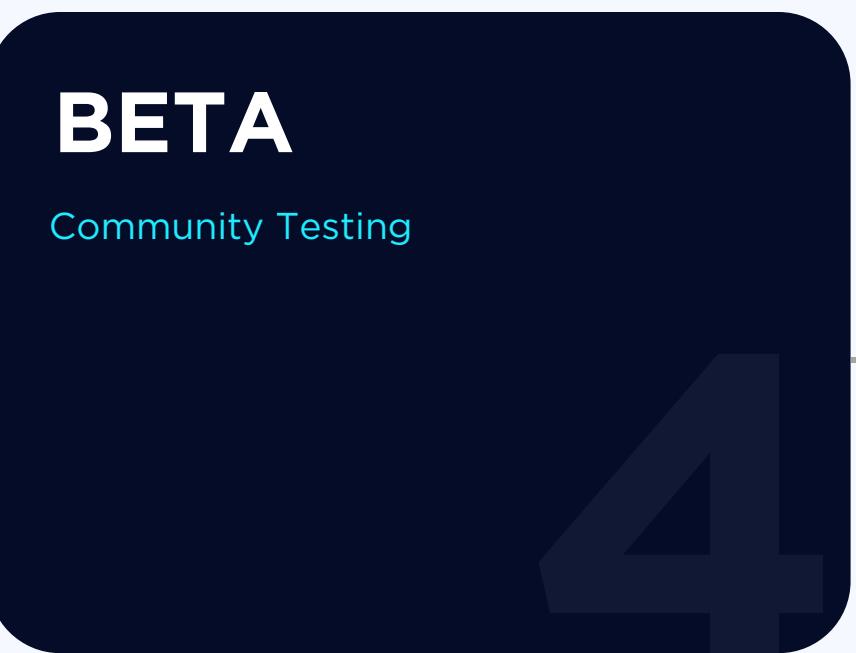

Integration

3

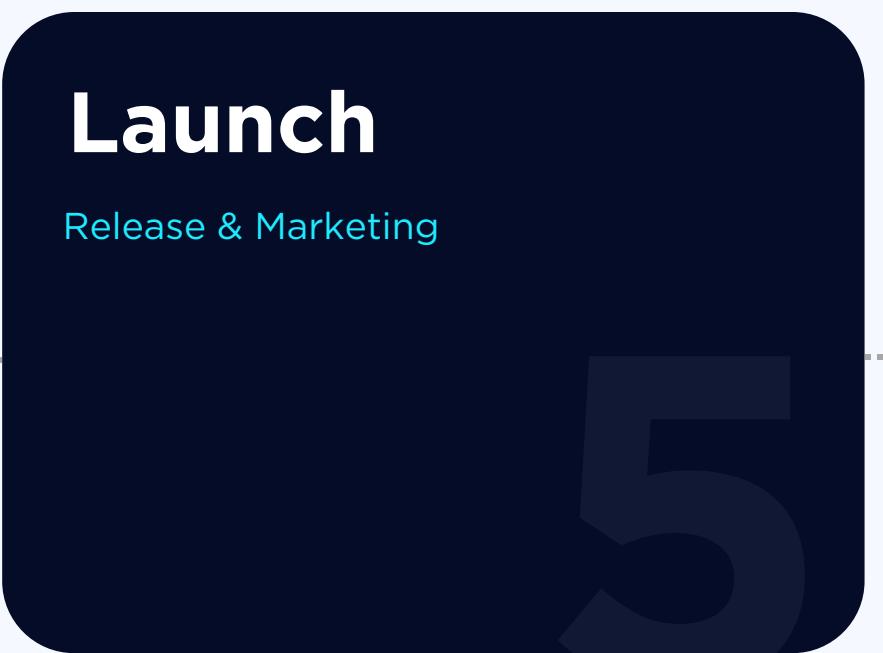

The open standard, WalletConnect, will be integrated into the Universal Wallet app, allowing users to sign in to platforms that support WalletConnect.

Development Roadmap

Our development roadmap for the EQTY Passport

Community testing will commence.

The final release will be made public, along with a launch partner.
